

## 50kw Wood Chip Boiler At A Council Depot

Start of the construction of the 4m X4m wood chip fuel store. The store will hold approximately 35m<sup>2</sup> of wood chip. The woodchip is sourced locally. There are plans to use the waste wood from the council's park department.

Installation of the underground heating pipe from the boiler to the council offices, 10 meters away.

Completed installation of the ETA HACK 50KW Woodchip, biomass boiler. A 50KW oil boiler can be seen in the background, this will be used as a back-up if the boiler runs out

Sloping floor of the wood chip store

Completed and filled wood chip store
